Through this amendment, the performance period has been extended by a base term of nine months with three three-month additional option periods, commencing on June 9, 2015. During this period, Liquidity Services will continue to serve as the sales channel for the disposition of DLA scrap property that is approved for public sale.

Additional modifications have been made to the principal terms of the contract including:

- Contract pricing will be adjusted to reflect a 65% profit sharing distribution to the DLA.

- The DLA may elect to terminate portions of the contract by certain commodity categories with a 60-day notification required no sooner than October 1, 2015.

Under the Scrap Contract, Liquidity Services manages the receipt, storage, marketing and disposition of virtually all scrap property generated by DoD installations throughout the continental United States, Alaska, Hawaii, Puerto Rico and Guam including: base materials and scrap metals like ferrous and non-ferrous metals, nickel alloy, electronic scrap, rubber, paper and in rare occasions, compost, cooking grease, and recycled asphalt.
